-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 02/10/2009, with respect to the rejection(s) of claim(s) 1 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Davies. See the new rejection below.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. **Claim 1** is rejected under 35 U.S.C. 102(e) as being anticipated by WO Publication 02/089479 to Davies (hereafter referenced as Davies).

Regarding **claim 1**, "a method for providing television services from a head-end to subscriber premises" reads on an audio/video content device with a storage unit (PVR) that receives and stores television content (abstract and pg.7, lines 1-8) disclosed by Davies and represented in Fig. 2 (element 140).

As to "method comprising the steps of: receiving by a first subscriber terminal via a first transmission link that is coupled to the first subscriber terminal,

a first television service that was transmitted from the head-end" Davies discloses (pg.12, lines 3-20) that the PVR receives broadcast signals from an head-end as represented in Fig. 4 (element 435).

As to "transmitting system information data specifying attributes of at least one local television channel to a second subscriber terminal coupled to the first subscriber terminal via a second transmission link, wherein the at least one local television channel has a frequency that is unused on the first transmission link by the head-end" Davies discloses (pg.32, lines 3-16) that the PVR transmits broadcast signal to STB using an out of band frequency. Davies further discloses (pg.26, line 22-pg.27, line 5) that the control data (EPG) is transmitted to a STB using out of band frequency as represented in Fig. 5.

As to "transmitting the first television service by the first subscriber terminal, on one of the at least one local television channel via the second transmission link, to the second subscriber terminal that is located at the subscriber premises" Davies discloses (pg.32, lines 1-16) that the PVR communicates broadcast signals, received and stored in storage unit of PVR, to STB using an out of band communications path as presented in Fig. 4.
